Injection Moulded Polywedge Screen Panels

This combination screen panel offers the excellent wear characteristics of polyurethane coupled with the high open areas of wedgewire.

The innovative screen panel consists of a standard modular 305 x 305 x 30 mm thick polyurethane frame with an 'Optima' stainless steel wedgewire insert - offering high abrasion and corrosion resistance. The polyurethane frame is injection moulded and the wedgewire insert is mechanically fastened to the frame.

Features/Benefits:

- Pin and sleeve fastening system
- Installed and removed with simple tools (from the top of the screen deck)
- Interchangeable wedgewire insert
- Proven modular system
- Reduced cost due to simplified manufacture

Applications:

Injection Moulded Polywedge screen panels are ideally suited to harsh abrasive applications, such as dewatering and de-sliming in the coal mining industry.
